

MANAS JAIN

AI/ML Intern | Machine Learning & Applied AI Enthusiast

Jaipur, India | +91 9166250388 | manasjain0704@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Machine Learning-focused Computer Science undergraduate (**CGPA 8.67/10**) with hands-on experience in **Python, SQL**, and cloud-based **ML deployment on AWS**. Skilled in building predictive models and end-to-end ML applications using Scikit-learn, Pandas, and NumPy, including a health-triage classifier. Currently deploying ML solutions on AWS as an ML Engineer Intern. Seeking an AI/ML & IoT Internship to build applied AI products such as conversational health-assistant tools.

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, SQL
- **Machine Learning & AI:** Supervised Learning, Predictive Modeling, Classification, Content-Based Filtering, Data Preprocessing, intro-level LLM/RAG concepts
- **Libraries & Frameworks:** Scikit-learn, Pandas, NumPy, Flask, FastAPI
- **Cloud & Deployment:** AWS (EC2, S3, IAM, RDS), ML Model Deployment, REST APIs
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Excel
- **Soft Skills:** Problem Solving, Communication, Adaptability, Time Management

EXPERIENCE

AWS Machine Learning Engineer Intern — Grass Solutions (P) Ltd

May 2026 – July 2026

- Develop and deploy machine learning applications on AWS cloud infrastructure, translating models from prototype to production.
- Utilize **AWS services** including EC2, S3, IAM, and RDS to support scalable, end-to-end ML project deployment — directly relevant to shipping cloud-hosted AI products.

Data Science Intern — Clover IT Services

June 2025 – July 2025

- Performed exploratory data analysis and data cleaning on real-world datasets using **Python, Pandas, and NumPy**.
- Built and evaluated machine learning models for prediction tasks, strengthening understanding of the full ML model lifecycle — from raw data to deployed prediction.

PROJECTS

Animal Health Symptom-to-Urgency Triage Classifier | Python, Scikit-learn, Pandas, Matplotlib

- Built an end-to-end ML pipeline that predicts triage urgency (Low / Medium / Emergency) for animals from reported symptoms, using veterinary red-flag heuristics to construct a labeled dataset of 2,500 cases.
- Trained a Random Forest classifier achieving 88.4% accuracy overall and 100% recall on Emergency cases — the critical metric for a triage system, since missing a true emergency is the costliest failure mode.
- Built an interactive CLI demo that takes symptom input and returns an urgency prediction with a plain-language recommendation, prototyping the core logic behind a conversational animal-health triage assistant.

Movie Recommendation System | Python, Pandas, NumPy, Scikit-learn

- Built a **content-based recommendation** engine using similarity-based filtering on engineered metadata features to generate personalized recommendations.

Binance Futures Testnet Trading Bot | Python, Flask, REST APIs

- Developed an automated bot integrating the **Binance API** for order placement, live market data retrieval, and strategy execution within a secure Flask-based architecture.

EDUCATION

B.Tech, Computer Science & Engineering — Arya College of Engineering, Jaipur

2023 – 2027

CGPA: 8.67 / 10

CERTIFICATIONS

- Python for Data Analysis — **NPTEL** (May 2026)
- Data Science Certification — **CodeWithHarry** (Dec 2025)

ACHIEVEMENTS

- **State-Level Netball Champion** (Nov 2022) Represented Bhilwara and secured the championship title at the state-level tournament.
